Head, Neck, and Endocrine Pathology

The Yale Head, Neck, and Endocrine Pathology Program supports the Yale-New Haven Hospital endocrine referral center, one of the largest in the nation for the treatment of thyroid and parathyroid diseases. The Head and Neck Oncology service is a tertiary referral center in Connecticut and treats complex and rare cancer cases. The senior lead pathologist on the team has more than 10 years experience in this area, and is readily accessible for second opinions and consultations. Our cytopathologists have extensive experience in Fine Needle Aspiration of thyroid and other head and neck nodules. Our specialized Yale Oral and Maxillofacial Pathology Program offers comprehensive diagnostic services on biopsy and cytology specimens. Areas of expertise are oral squamous cell carcinoma, odontogenic cyst and tumors. The service is run by a board-certified Oral and Maxillofacial Pathologist and has the clinical support of the multiple subspecialties at Yale School of Medicine and Department of Pathology.

Hematopathology

The Yale Hematopathology Program provides state-of-the-art diagnostics with an emphasis on molecular techniques for the diagnosis of hematological disorders. Areas of expertise include leukemia, lymphoma, multiple myeloma, myeloproliferative myelodysplastic syndromes, dysproteinemias, coagulation disorders, red blood cell diseases, and hemoglobinopathies. We offer a complete consultation service in coagulation disorders, with state-of-the-art functional, proteomic, and genetic testing. The partnership between Yale Pathology and Laboratory Medicine allows us to offer comprehensive services that ensure a multidisciplinary approach to diagnosis and permit clinicopathological correlation.

Manju Prasad, MD
Professor of Pathology
Director, Endocrine, Head and Neck Pathology
Director, Immunohistochemistry Laboratory

S. David Hudnall, MD
Professor of Pathology and Laboratory Medicine
Director, Pathology Education

Demetrios T. Braddock, MD, PhD
Associate Professor of Pathology

Samuel Katz, MD, PhD
Assistant Professor of Pathology

Andrea Barbieri, MD
Assistant Professor of Pathology

Mina L. Xu, MD
Associate Professor of Pathology and Laboratory Medicine
Director, Hematopathology Program

Melissa Much, MD
Instructor in Pathology

Sudhir Perinchery, MD, PhD
Instructor in Pathology

John Sinard, MD, PhD
Professor of Pathology and Ophthalmology and Visual Science
Vice Chair, Pathology
Director, Anatomic Pathology
